FACE IMAGE QUALITY WORKSHOP

Bill Perry
Identity & Biometrics SME
Sydney Border Practice

LET'S MOVE THE WORLD, TOGETHER

Panel Discussion: What type of algorithm

Context
- Started in biometrics in 1985
- Worked in various government depts in multiple countries
- Worked for Barclays, Cogent, Unisys, 3M and Sita
- Involved in ICAO/ISO standards since 2000.

SITA

Position on Panel discussion

- My position is that:
    - OFIQ that must enable a common measurement and understanding of "good" and "medium" quality
    - Help reduce vendor lock-in
    - Provide a level playing field when comparing image quality from multiple vendors
- My belief is that this can only truly be achieved through a Face Image Quality Standards containing an Open Source Reference Implementation

SITA

Thank you.
